12. 25pm – 13.00pm **Lunch**

Afternoon Session

Delegates will be assigned to groups and participate in all of the following sessions :

13.05pm – 16.05pm

Laboratory Workshop -

An introduction to Pathology - the study of disease. Pathology is involved in 70% of diagnoses made and is the science behind the cure. Pathologists are medically trained doctors and integral to the care of patients both in and out of hospital.

A Patient Journey -

Modern medicine is increasingly complex. To illustrate this we will follow the story of Mr O from the start of his illness and admission to hospital, through how their diagnosis was made and managed, to the point at which they were sent home. We will consider the role of medical teams and allied professionals in patient care, and look at how modern technology combines with old skills to enable us to care for our patients at times when they are vulnerable.

ECG - What is an ECG -

A brief talk on how to perform a 12 Lead ECG by Tim Jones, Associate Practitioner, Cardiac Investigations.

16.05pm **Evaluation**

16.15pm **Depart**
