Get your device adjusted online

Whether you are new to Ponto or want to
upgrade your existing sound processor,
Ponto 5 Mini gives you access to more sound
and proven better speech understanding with
the OpenSound Navigator.^{1,2}

*When fitted according to recommendation

Stay connected with your sound environment

Conventional sound processors aim to improve speech understanding by removing sound, such as by using directionality to just focus on the speakers in front of you. While this may improve speech understanding, it can also leave you feeling cut off.

Ponto 5 Mini takes a different approach. Its pioneering OpenSound Navigator technology lets you hear sounds from all around you.

This makes it easy to follow what's going on. And the results of this technology speak for themselves: speech understanding is improved by more than 20%.²

In addition to creating an open sound environment, the pioneering Ponto 5 Mini also gives you more stable sound and prevents audible feedback.¹

If you're experiencing feedback with your current bone-anchored system, ask your hearing care professional about trying a Ponto 5 Mini.

Try the open sound experience for yourself.
Ask for a trial of Ponto 5 Mini.

Better speech understanding with less listening effort

Ponto 5 Mini uses OpenSound Navigator technology to open up the full soundscape, so you can hear sounds from all directions.

New research confirms that this open soundscape gives the brain what it needs to create a better listening experience. It has been proven to enable better speech understanding with less listening effort.²

Only Ponto bone-anchored sound processors with BrainHearing™ technology offering open sound experience can give you access to the full soundscape.

Connect, stream, and relax

Whether you want to have a video call, watch TV, or talk on the phone, your Ponto 5 Mini can wirelessly connect to a wide range of digital devices used in daily life.

- **2.4 GHz Bluetooth Low Energy**
connect to your smartphone
- **Oticon ON App**
adjust the volume, change programs, and much more using your phone
- **EduMic**
stream the teacher's voice or connect to FM or telecoil
- **ConnectClip**
stream to and from your smartphone and use as a remote microphone
- **TV Adapter 3.0**
stream sound from your TV
- **Oticon RemoteCare App**
attend appointments with your audiologist online. Contact your local Hearing Care Professional to learn more about RemoteCare
- **IFTTT – the Internet of Things**
connect to internet-enabled devices and services
- **Ponto Care App**
support to get the best experience with Ponto 5 Mini

The ultimate in discretion and reliability

Ponto 5 Mini is small, discreet, and available in different colors to blend in with your hair. Or you can add your personal style using the bright and colorful skins or stickers.

Performance you can rely on

All aspects of the Ponto 5 Mini have undergone extensive testing, including drop tests, humidity and sweat tests, extreme temperature changes, and full immersion in water.* That's why you can be sure that the Ponto 5 Mini won't let you down.

LED indicator

The LED indicator light can be activated to help caregivers monitor the status of the processor.

“

I was incredibly surprised two weeks later when I had the final fittings. That I was able to hear so much and from all around me. I was amazed.”

Fatima, Ponto user

*IP 57 classification
